Art Unit: 3751

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-3 are rejected under 35 U.S.C. 102(b) as being anticipated by Wade.

Wade discloses a fuel tank 1 that is capable of receiving gasoline and oil as claimed including a pump 7, a draw tube 16, a dispenser nozzle 8, 9, a pump outlet connection to a valve 14 with a down tube 13, and a jetting pipe 15.

3. Claims 1-3 are rejected under 35 U.S.C. 102(b) as being anticipated by Lebow.

Lebow discloses a fuel tank 2 that is capable of receiving gasoline and oil as claimed including a pump 4, a draw tube 3, a dispenser nozzle 1, a pump outlet connection to a valve 25 that only activates flow through down tube 31 and into a jetting pipe 27 when fluid levels are low but otherwise shuts off flow through 31.

4. Claims 1 and 2 are rejected under 35 U.S.C. 102(b) as being anticipated by Thau. Thau discloses a fuel tank G that is capable of receiving gasoline and oil as claimed including a pump A, a draw tube 55', a dispenser nozzle E, a pump outlet connection to a valve J with a down tube 54, and a jetting pipe 55.

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Blanchet et al. And Colonna teach methods of mixing gasoline and oil but do not teach a method step of forming a jetting outflow of liquid in a tank containing oil and gasoline.

6. Claims 4 and 5 are allowed.
